ABOUT AVLIGHT

AVLight Automotives was established in 1996 in the industrial hub of north India, Faridabad, by a group of industry professionals, to manufacture AUTOMOTIVE LIGHTING EQUIPMENTS AND PLASTIC MOLDED ITEMS.

Under expert guidance and with a collaborative team effort, AVLight has out paced the standard industry growth rate in the last ten years. During this period the business has grown many folds and the annual turnover has reached US \$ 50 Million (2005- 2006). The company has been expanding it's horizons and last year achieved an export turnover (American & European markets) that was 25 % of the annual turnover.

In 2004 AVLight commissioned a second plant at Manesar, Haryana, India. The factory has state of the art Plastic Injection Molding Facilities, Assembly Section and a Tool Room equipped with CAD - CAM. The dynamic leadership of the top Management and the dedicated effort of the entire team has helped the company expand at a steady pace to meet the needs of our customers by providing reliable quality products with total focus on **QUALITY, COST AND DELIVERY.**

TEAM

AVLight has a staff of 250 employees. The work force comprises of skilled and semiskilled workers, technicians and experienced team of engineers and managers. The Team has expertise in design, development and production of international quality products. Our core strength is the in house Product Development Cell and Tool Room with CAD-CAM utilities. The Team works closely with the customers to match their standards of Development, Quality, Cost and Productivity, within prescribed time limits.
